DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 8, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hawker et al (6486407).

Hawker et al discloses in the figures a switching device provided with a neutral conductor 26 and arranged for opening and closing an electric circuit, the switching device comprising a frame 20, through which the electric circuit's neutral conductor having a first end 26 and a second end 49 passes, wherein the neutral conductor comprises a movable middle portion formed by switch 50 that is arranged for breaking the neutral conductor inside the frame, the movable middle portion being movable with respect to the first and the second end of the neutral conductor and located between them. The button 60 forms a pressing means for pressing the movable middle portion against the first and the second end of the neutral conductor. The switching device is a modular switching device wherein the neutral conductor is located in a control device module.

Allowable Subject Matter

Art Unit: 2833

3. Claims 3-7, 9-13, and 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hoyt, Kohloff, Beling, Draper et al, Agabekov, Hodder et al, Fiorini et al, Chilton et al, Dannenberg, and Fonesca teach various switching devices for switching a neutral conductor.
